

CSE:IRV
OTCQX:IRVRF

August 17, 2021

Irving Resources Inc. (Irving) is a Canadian-based mineral exploration company with a focus on gold in Japan. Irving also holds, through a subsidiary, a Joint Exploration Agreement with Japan Oil, Gas and Metals National Corporation (JOGMEC). Irving resulted from completion of a plan of arrangement involving Irving, Gold Canyon Resources Inc. and First Mining Finance Corp. and commenced trading on the CSE under the symbol IRV in December, 2015. In 2016, Irving's wholly-owned subsidiary, Irving Resources Japan GK, (IRV Japan) was established.

Japan

In Japan, Irving is focused on identifying high-silica, high-grade epithermal Au-Ag veins that could potentially be suitable for use as smelter flux in the many operating base metal smelters throughout the country. Recovery of precious metals occurs during the smelting and refining process.

Management

Akiko Levinson, Director and President

Dr. Quinton Hennigh, Director and Technical Advisor

Douglas Buchanan, Q.C., Director

Kevin Box, Director

Haruo Harada, Director and President of Irving Japan

Lisa Sharp, CPA, CGA, Chief Financial Officer

Hidetoshi Takaoka, Technical Advisor and Chief Mining Engineer, Irving Japan

Toshiyuki Goto, General Manager, Omu Office and Omui Mine Site, Irving Japan

Dr. Takeshi Uemoto, Omu Project Manager, Irving Japan

Corporate Head Office

Irving Resources Inc.

Suite 404 - 999 Canada Place

Vancouver, BC

Japan continued

In 2016, IRV Japan secured the 2.98 sq km Omui mining license on the island of Hokkaido, Japan. To augment its land position, IRV Japan has secured 2.18 sq km of surface rights and filed 56 prospecting licenses covering an additional 171.38 sq km of prospective ground encompassing the entirety of the Omu volcanic graben.

Irving's 2017 exploration program at Omu, carried out by Mitsui Mineral Development Engineering Co., Ltd. (MINDECO), included stream sediment analyses by Bulk Leach Extractable Gold (BLEG) method, a detailed soil grid, a detailed gravity survey and drone-based magnetics. Results proved highly encouraging and helped target advanced exploration including trenching, drilling and bulk sampling.

From March 2019 to present, the Company drilled 36 diamond holes at Omu Sinter and Omui Mine site. Remarkably, nearly all holes completed have encountered one or multiple high-grade Au-Ag veins, indicating both locations host robust mineral systems. Follow up drilling will be undertaken in the Fall of 2021 along with Phase I drilling at the highly prospective Hokuryu target.

In June 2020, Irving announced acquisition of the historic Yamagano Mining License and adjoining East Yamagano prospecting licenses located in Kyushu. Yamagano is a famous historic high-grade mine located 11 kms south of the world class Hishikari mine operated by Sumitomo Metal Mining Co. Ltd. Yamagano has seen no modern exploration. Irving believes there is excellent potential to discover more high-grade veins at Yamagano and the adjoining lands controlled by Irving.
